New Product Introduction

STYLED FOR THE 90'S:

THE LADYSMITH PISTOLS

Because our LadySmith® revolvers met with such overwhelming success, we could have spent the last 12 months sitting back congratulating ourselves for a job well done. We didn't.We kept listening to what thousands of women told us when they called our toll-free information number, and we read what they had to say in their letters.

And what resulted is a new addition to the LadySmith® line, the models 3913-LS and 3914-LS.

They're very compact 9mm pistols, restyled for a contemporary look and feel. Noticeably slimmer and sleeker with contoured, rounded trigger guards and bobbed hammers, the LadySmith® pistols feature a dynamic new frame design with optimal weight redistribution for greater shooting comfort--as well as good looks.

Available in deep blue matte finish with black grips or frosted stainless with matching gray grips, the LadySmith® 9s are ergonomically correct for a woman's hand--and their alloy-steel combination construction makes them lightweight without sacrificing durability. They feature Novak LoMount Carry rear sights, 3-dot sight system, smooth edges for snag-resistance--and, naturally, our consistently smooth double action trigger pull.

The LadySmith® pistols. The latest answer to a contemporary need--and developed at the suggestion of the women who need them.
